SELECTED PROJECTS

Coke Studio Website

<http://www.cokestudio.com.pk/>

Established a mechanism for AJAX requests to avoid postback to server. Linked video player (youtube, jwplayer) and audio player for better user experience. Developed play list that visitor can populate with their favorite songs and save them in playlist for future using technologies like AJAX, JSON, JQuery and asp.net. To leverage social networking user base integrated GIGYA Javascript framework and write code against its events when user login and logout .

MCB ATM Locator

<http://demo.creativechaos.co/MCBATMLocator/>

Built user experience, UI concept and then coded the interface using some best practices and design patterns. To get loose coupling between UI elements implemented Observer pattern. For modularity and testability

Najam Sikander Awan

■ +92-345-3066429 ■ najamsk@gmail.com

implemented Sandbox pattern along with modules pattern. Wired all the code with YUI Doc and Qunit for automated document generation and unit testing.

The Design Firm New Website

<http://www.thedesignsfirm.com/>

Developed in asp.net 3.5 using linq to sql and N-Tier development approach. Write xhtml/css and used 960 grid framework for frontend development. Jquery also used for some interactivity.

Lals Chocolate

<http://lalschocolate.com/>

Responsible for whole project as a single developer and implemented features in asp.net 2.0 like Master Pages, Admin Panel, Shopping Gallery, Shopping Cart Component, User Interface development, Ajax development for interactivity, Asp.net Membership for User management and database design.

Buttercup Nannies

<http://www.buttercupnannies.co.uk/>

Developed front-end in xhtml/css and jquery and asp.net 3.5,/C# for backend development using LINQ.

Z2Jeans

<http://www.z2jeansco.com/>

This project developed in asp.net 2.0 with Ms Access as database my responsibilities were Asp.net Membership implementation, Invoice Generation, 2CO Integration, Email alerts, Database Design and Admin Panel.

DAE Global

<http://www.daeglobal.com/>

Front-end development, ajax, wordpress coding to pull of data from database. Built using HTML5/CSS3 with fallback support for older browser that have no support of html5 video and micro formats.

Master Foods

<http://masterofthebarbie.at.impactproximity.com>

Frontend development and integration with dot net nuke.

Quick Contractors

<http://www.quickcontracotrs.com/>

Quickcontractors.com is a dynamic business website and major part of my work includes development of Lead System (includes project management, bidding, commission report), Calendar + Todo List + Reminder System, Signup System, Articles and News System and remote database management.

Fatima Bhutto

<http://www.fatimabhutto.com.pk/>

Created living breathing website from design psds
